DETAILED ACTION

1. This application has been examined. An informational disclosure statement filed December 8, 2003. Claims 1-8 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by McNeely et al.

See Figure 1D, column 5, lines 50+ (stopping means, for example, changing diameter, contact angle, changing surface tension or a combination thereof). Aspect ratio is discussed in column 6, lines 1+. Stopping of the flow is controlled by a hydrophobic restriction and/or hydrophilic restriction. A “hump” defined by 2a is shown in Figure 1D. With regard to claim 4, note Figures 5A-5D. The “hump” delays the flow. Parallel fluidic circuits are shown in Figure 5A.

4. The prior art made of record and not relied upon is considered pertinent to applicants’ disclosure. In particular, see Figure 11 of Brown, Bowles (clearly showing a “hump”), and O’Connor et al (Figure 2B-47 and 57, column 5, lines 51+ and column 7, lines 10+).
